SUMMARY

An enthusiastic final-year Informatics Engineering student with a strong passion for technology and innovation. Skilled as a **Front-End Web Developer** with approximately two years of hands-on experience, specializing in building responsive and user-friendly web applications using modern frameworks such as **Laravel** and **React.js**. Highly interested in the field of **AI Engineering**, with a growing focus on integrating intelligent solutions into web development. Known for a strong attention to detail, creative problem-solving, and the ability to transform ideas into engaging digital experiences. Eager to contribute technical expertise and continue learning in a dynamic and forward-thinking environment.

EDUCATION

BANTEN JAYA UNIVERSITY

Final-Year Student, Engineering Informatics

- Current GPA: 3.89/4.00

EXPERIENCE

Frontend Developer Intern

April 2026 – August 2026

Pt Data Inovasi Integrasi

- Developed modular HRIS features using Next.js under a Micro Frontend architecture, managing tasks via ClickUp tickets and collaborating on GitLab repositories.
- Integrated complex backend REST APIs to handle dynamic parameters, establishing precise pagination controls, data limits, and multi-key search functionalities across payroll drawers.
- Optimized the Overtime Approval (Approval Lembur) system by building schedule-comparison modals (comparing employee schedules side-by-side) and debugging page-routing state issues on multi-page submissions.
- Resolved dynamic form-state conflicts on Master Komponen Penggajian to prevent stale/duplicate inputs during component type changes, and engineered interactive column visibility toggles for real-time table customization.

AI ENGINEER PARTICIPANT

Januari 2026 – July 2026

Coding Camp Dicoding by DBS Foundation

- Gained hands-on experience in building and analyzing data-driven solutions using **Python** and **visualization** techniques to extract meaningful insights.
- Designed and developed interactive data visualizations using **libraries** such as **Scikit-learn** to effectively communicate analytical results.
- Developed and deployed **RESTful APIs** using **FlaskAPI** to serve machine learning models, enabling real-time predictions and integration with external applications.

ADMINISTRATIVE ASSISTANT INTERN

Maret 2025 – April 2025

Bawaslu Banten Province

- Managed and maintained official **travel records**, including documenting and organizing **business trip data** and compliance with administrative procedures.
- Actively participated in preparing and **documenting meeting minutes** notulen related to official travel activities and key points were clearly recorded.
- Assisted in **organizing administrative documents**, including reports, correspondence, and travel-related files for easy access and proper archiving.

ROBOTICS INSTRUCTOR

September 2024

Banten Regional Jambore

- Delivered robotics training sessions to **400+ students**, introducing fundamental concepts of robotics, electronics, and **programming** using **Arduino**.
- Guided participants through hands-on learning activities, enabling them to **understand basic circuit** design.
- Demonstrated and explained practical robotics projects, including an **automatic trash bin** system and a **traffic light simulation**, to enhance students' understanding of real-world applications.

PROJECT

SISTEM APOTEK KENCANA

[Github Link](#)

Comprehensive multi-role pharmacy inventory and supply chain management platform

- **Architected a role-based access control** system with **4 distinct user** modules, enabling seamless collaboration across pharmacy operations with granular permission management for **50+ features**.
- **Engineered an end-to-end medicine** request workflow with real-time tracking, integrating automated status updates and audit trails to ensure supply chain transparency and accountability across pharmacy branches.
- **Developed comprehensive reporting system** with dynamic dashboards and Excel/PDF export functionality, providing management with business intelligence for demand forecasting and inventory optimization.
- Technologies Used: PHP 5.6+, MySQL, Bootstrap 5, Chart.js, jQuery, AJAX

CONCULTACY.MY.ID

[Production Link](#)

Comprehensive online academic consultation platform for thesis, journal publication, and research guidance.

- **Architected a multi-service consultation platform** with tiered pricing packages (monthly to semester-based), enabling seamless client onboarding through WhatsApp integration and real-time session scheduling with zoom/meet video conferencing support.
- **Engineered role-based tutor management** system with specialized domains, featuring detailed tutor profiles, client testimonials, and portfolio documentation to showcase expertise across 50+ academic consultation topics.
- **Built robust testing** and staging infrastructure with database seeders for tutor profiles and pricing configurations, enabling rapid feature iteration and deployment across production environments with zero downtime.
- Technologies Used: Laravel 12, PHP 8.2+, MySQL, Bootstrap 5.3, Vite, JavaScript/Axios, Faker.

HOUSE PRICE PREDICTION DASHBOARD & API

[Github Link](#)

Comprehensive machine learning platform for house price estimation, combining interactive analytics dashboard and backend-ready prediction API.

- **Architected an end-to-end property valuation system** using **Gradient Boosting Regressor**, enabling fast and data-driven house price predictions from key property attributes with structured feature alignment and preprocessing pipelines.
- **Engineered a dual-interface solution** with Streamlit for visual analytics and user-friendly prediction workflows, alongside Flask REST API for JSON-based integration into external web and mobile applications.
- **Built model-serving workflow** with serialized artifacts and feature-column management to ensure consistent inference between training and production, including missing-feature handling and robust default-value reindexing.
- Technologies Used: **Python 3.8+**, **Scikit-learn**, **Streamlit**, **Flask**, **Pandas**, **NumPy**, **Plotly**, **Joblib**.

ORGANIZATIONAL EXPERIENCES

COMPUTER COMMUNITY STUDENT ORGANIZATION

Vice Chairman

March 2024 – June 2025

- Managed and oversaw the organization's internal learning programs, ensuring structured and continuous skill development for members.

General Secretary

March 2023 – March 2024

- Managed all internal administrative processes, including preparing and distributing meeting minutes, invitations, official letters, and activity reports using digital tools such as Google Docs, Google Sheets, and Google Drive.

HIMPUNAN MAHASISWA TEKNIK INFORMATIKA (HUMANIKA)

March 2023 – June 2025

Member

- Organized leadership and teamwork training programs for new members, while guiding them in understanding their roles, responsibilities, and contributions within the organization.

SKILLS

Front-End: Laravel, React.js, Tailwind CSS, Bootstrap, HTML, CSS, PHP, JavaScript

Back-End: Node.js (Express), Python, REST API Development

Database: MySQL, PostgreSQL

Testing & Tools: Git, Postman, Figma, Trello

Other Skills: API Integration, Responsive Web Design, Basic Machine Learning Integration.

CERTIFICATIONS

BNSP Certified Database Junior
(2026)
